Schedule for Budgetary Offer of Andhali Lift Irrigation Scheme

Description	Quantity	Unit	Rate/ Unit (Rs)	Amount (Rs)
Pump Parameter Details				
Design with quality assurance plan at all stages of manufacturing supply, erection, testing to full capacity & commissioning at site of work Vertical Turbine Pumps 750HP(Tentatively), non pull out type,complete with strainer ,suction bell,column assembly,Discharge case/Discharge Tee motor stool,flexible coupling,sole plates,base frame foundation ,non-reversible rotation ratchet arrangement etc.suitable for following duties specification and conforming to specifications as given below .	3	Nos		
a) Duty point discharge -2.080 m ³ /sec				
b) Duty point head-71.02 meter				
c) Pump RPM -1000				
d) Efficiency - 90%				
e) Head range- 53 to 79 meter				
f) Lubrication system = Forced water				
g) Type of delivery - Surface delivery				
h)No of maximun stage- Single stage				
i) Column pipe diameter- 700 mm				
j) Column pipe thickness (min) - 7 mm				
k) Line shaft diameter - 100 mm				
l) Max.no of pumps working in parallel - 3 No				
H.T.Motors Specifications Details				
Design,Manufacturing,Supply, Errection,testing to full capacity,commisioning at site of work 610 KW(Tentatively) TEWC CACW IC81 vertical solid shaft, 3 phase, 6 pole round rotor squirrel cage induction motors.Operating at 1000 rpm Synch, Having maximum efficiency at duty point S1 duty, class of insulation F, efficiency class ie2/ie3, suitable for operating pump of specified rating at specified duty head & discharge(for driving above mention pump) without any undue heating of any part & give specified power factor & efficiency at duty,motor should be as per revised IS325& relevant IEEE Standardes. a) Operating Voltage-6.6 KV	3	Nos
